TECHNICAL SKILLS

FRONTEND

ReactJS 18/19 | TypeScript | Redux Toolkit

BACKEND & DB

Node.js | PostgreSQL | MSSQL / MySQL | Koa.js / Fastify | Kysely ORM

ARCHITECTURE & CLOUD

AWS | Docker | Redis / BullMQ | Monorepos

AI & TOOLS

AI Integration | Prompt Engineering

EDUCATION

Practical Software Engineer
Ort Singalovski | 2017 – 2019

- Graduated Oct 2019
- GPA: 85

MILITARY

Anti-Air Defense Combat Soldier
IDF | 2011 – 2014

Honorably discharged with the rank of First Sergeant.

LANGUAGES

Hebrew	Native
English	Advanced

PROFILE

Senior Fullstack Developer specializing in the React and Node.js ecosystems. Proven track record of architecting enterprise-grade, high-traffic platforms from scratch—including multi-tenant paywalls, complex data pipelines, and AI-assisted tools. Adept at leading scalable TypeScript monorepos, integrating diverse APIs, and streamlining corporate workflows to deliver robust software solutions.

EXPERIENCE

Senior Fullstack Developer | YIT

2020 – Present

- **Enterprise Paywall & Auth (WCM):** Architected a multi-tenant TypeScript backend serving major Israeli media brands (Ynet, Calcalist). Implemented dual-cookie JWT sessions, OAuth, external payment gateways (CreditGuard, Apple/Google IAP), and managed PostgreSQL schemas using Kysely and InversifyJS DI.
- **Editorial CMS (WCM Front):** Engineered a large-scale React/Redux platform used across 10+ Israeli media sites. Built a multi-module architecture featuring a WYSIWYG drag-and-drop editor, real-time Socket.io collaboration, strict RBAC, and a multi-site SSR build pipeline.
- **Digital Print & AI Archives:** Built production interactive newspaper readers in React 19 featuring custom page-flip physics and spatial hit-testing. Engineered an AI-assisted PDF segmentation pipeline utilizing ML clustering and Ghostscript to digitize historical print media.
- **Internal Operations (yDesk):** Developed a full-stack corporate workflow platform managing tasks for journalists. Integrated Active Directory authentication, Telegram bots, background processing queues (BullMQ/Redis), and automated antivirus scanning.
- **Data Pipelines & Microservices:** Designed a scheduled Node.js sync engine for Maccabi Tel Aviv integrating disparate sports APIs using complex SHA1 identity deduplication. Architected an AWS-based secure video encoding pipeline featuring automated S3 bucket polling.

Fullstack Developer | Wittix

2019 – 2020

- **Banking Platform:** Collaborated with a team to develop a comprehensive banking system from the early architectural stages.
- **Marketing & Admin Architecture:** Solo-developed the main Wittix website and a dedicated campaign management panel, building both the front-end and back-end infrastructure.
